

Company Profile

- **A-TAKE SERVICES LIMITED** was incorporated in October 2017 as a privately held company. An established provider of Oil and Gas Services, Marine Logistics, Construction works, Civil works, Dredging Services, Surveillance and Monitoring Systems Services.

PHILOSOPHY

Anchoring our business relationship on mutual trust because we believe in strategic partnership

VISION

To make A-take Services Limited the destination for oil and gas, marine and logistics services while putting into action new ideas and solutions that will benefit our client.

MISSION

Our mission is to provide professional services through traditional hard work and international best practices, with the highest commitment towards exceptional service delivery.

ABOUT US

ABOUT US

A-TAKE SERVICES LIMITED is a dedicated privately owned company specialized in the delivery of high quality services in the oil and gas sector. We provide solutions in the areas of Marine Logistics, Dredging, Fabrication, Insulated Pipes and Procurement. We also render industry services through our earned experience, state-of-the-art equipment and craftsmanship

We offer several services and logistics solution with activities encompassing all areas of the oil and gas sector within Nigeria and Sub-Saharan Africa. Registered as a private company, with fully operational offices in Nigeria.

SERVICES

OUR SERVICES

Combining our extensive experience, we aim to find innovative solutions to meet the needs of our clients and the provision of direct supervision, monitoring and liaison at all stages of preparation and execution of project. We believe we can offer assistance to any marine, oil and gas projects, large or small.

- OIL AND GAS SERVICES
 - a. OFFSHORE
 - b. ONSHORE
- MARINE LOGISTICS
- PROCUREMENT SERVICES
- SURVEILLANCE AND MONITORING SYSTEM

OIL AND GAS SERVICES

Offshore: A-take Services delivers high quality steel pipes, with focus on durability and efficient thermal insulation solutions for both shallow and deep-water offshore pipeline projects. Also, we do fabrication of platforms, dredging services, perform insulation coating and joint installation.

Onshore: We offer a full range of pre-insulated pipeline products to cover a variety of onshore applications for oil and gas. Our standard product, with a moisture surveillance system, can be used without an anti-corrosion coating and is rated to a service life of over 30 years. An optional anti-corrosion coating can be applied if required.

We are the market leader in high-end services and have extensive experience harnessing the extreme forces of the oil and gas industry.

MARINE LOGISTICS

Our team of highly qualified logistics experts with significant knowledge about the marine logistics industry and passion to service the industry effectively, results in ongoing product development to ensure top operational performance.

We pride ourselves to timely and comprehensive supply chain management services, provisioning, delivery and implementation.

Our rich logistics solutions ranges from effective innovations in marine logistics and support services, dredging, procurement of anti-coating materials, supply joint coating tools, inland water way ferry services, charter, equipment leasing / rental, marine vessels procurement / supply, offshore operation supports, petroleum products supply, joint installation services (laborers, supervisor and technicians).

SURVEILANCE AND MONITORING SYSTEMS

Integrity monitoring of oil and gas pipelines can quickly identify a leak or third-party incursion event. Distributed optical fiber sensing offers a pipeline monitoring system that is not available with any other technology. Early detection of a leak or intrusion together with the accurate identification of the location allows time for either safe shutdown or rapid dispatch of security, assessment and clean-up personnel giving benefits in terms of reduced environmental impact and reduced health risks to the local population. An effective and appropriately implemented monitoring system can easily pay for itself through reduced product loss, potential consequential losses and an increase in public confidence.

SURVEILLANCE AND MONITORING SYSTEMS

We deploy several surveillance systems, this includes intrusion detection and leak detection based on both acoustic and temperature variations. At the heart of the system are both the Ultima™ Distributed Temperature Sensor (DTS) and Distributed Acoustic Sensor (intelligent DAS) allowing coverage of ranges up to 10's km continuously.

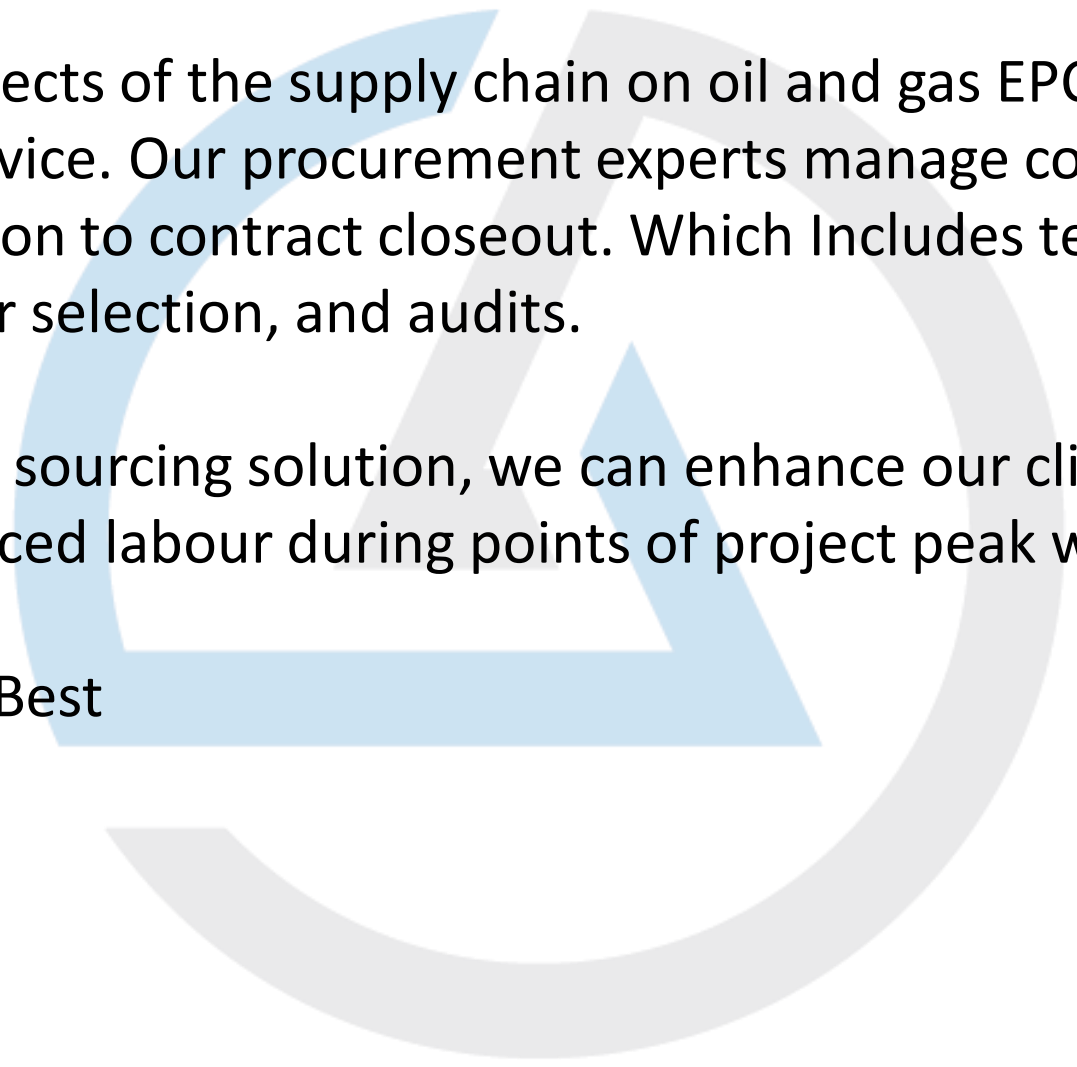

Also intelligent Pipeline Surveillance System (iPSS™) allows oil & gas pipeline operators to continuously and simultaneously monitor for leaks and threats to the pipeline along its entire length, and is the only system that can offer such complete coverage, utilizing fiber optics and underpinning the detection technology.

PROCUREMENT SERVICES

Our aim at A-take in offering required procurement services is to extend our knowledge, purchasing capacity and logistics expertise to our varying clients. While doing so we can drive value savings for our clients that originates from A-take supplying to multiple major projects in a given precinct.

Our Procurement Department supports Clients by purchasing quality goods and services at competitive prices, promoting supply chain diversification, applying proper financial stewardship for payments, and providing responsive service to all A-take clients.

A-take manages all aspects of the supply chain on oil and gas EPC projects, or as a stand-alone service. Our procurement experts manage contracts from the request for quotation to contract closeout. Which Includes tender support, bid evaluation, supplier selection, and audits.

As part of our strategic sourcing solution, we can enhance our client's procurement function with experienced labour during points of project peak workload.

We Are Always At Our Best
